Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 174, September 1997

DETECTION OF MITOCHONDRIAL DISEASES
F.N. Gellerich and S. Zierz, guest editors

Preface 1–3

Part I: Noninvasive detection of mitochondrial function

W. Bank and B. Chance: Diagnosis of defects in oxidative muscle metabolism by non-invasive tissue oximetry 7–10

B. Barbiroli, S. Iotti and R. Lodi: *In vivo* assessment of human skeletal muscle mitochondria respiration in health and disease 11–15

J.A.L. Jeneson, R.W. Wiseman and M.J. Kushmerick: Non-invasive quantitative ^{31}P MRS assay of mitochondrial function in skeletal muscle *in situ* 17–22

R.W. Wiseman and M.J. Kushmerick: Phosphorus metabolite distribution in skeletal muscle: Quantitative bioenergetics using creatine analogs 23–28

G.J. Kemp, D.N. Manners, J.F. Clark, M.E. Bastin and G.K. Radda: A theoretical model of some spatial and temporal aspects of the mitochondrion creatine kinase myofibril system in muscle 29–32

F.A. van Dorsten, T. Reese, J.F. Gellerich, C.J.A. van Echteld, M.G.J. Nederhoff, H.-J. Muller, G. van Vliet and K: Nicolay: Fluxes through cytosolic and mitochondrial creatine kinase, measured by P-31 NMR 33–42

F.D. Laterveer, K. Nicolay, F.N. Gellerich: Experimental evidence for dynamic compartmentation of ADP at the mitochondrial periphery: Coupling of mitochondrial adenylate kinase and mitochondrial hexokinase with oxidative phosphorylation under conditions mimicking the intracellular colloid osmotic pressure 43–51

Part II: Bioenergetic investigation of isolated mitochondria, skinned muscle fibers and cells

H.N. Rasmussen and U.F. Rasmussen: Small scale preparation of skeletal muscle mitochondria, criteria of integrity, and assays with reference to tissue function 55–60

H.R. Scholte, Y. Yu, J.D. Ross, I.I. Oosterkamp, A.M.C. Boonman, H.F.M. Busch: Rapid isolation of muscle and heart mitochondria, the lability of oxidative phosphorylation and attempts to stabilize the process *in vitro* by taurine, carnitine and other compounds 61–66

V. Mildaziene, R. Baniene, A. Marcinkeviciute, Z. Nauciene, A. Kalvenas and A. Zimkus: Tetraphenylphosphonium inhibits oxidation of physiological substrates in heart mitochondria 67–70

W. Sperl, D. Skladal, E. Gnaiger, M. Wyss, U. Mayr, J. Hager and F.N. Gellerich: High resolution respirometry of permeabilized skeletal muscle fibers in the diagnosis of neuromuscular disorders 71–78

L. Kay, A. Rossi and V. Saks: Detection of early ischemic damage by analysis of mitochondrial function in skinned fibers 79–85

A. Toleikis, D. Majiene, S. Trumbeckaite and A. Dagys: The effects of ischemia and experimental conditions on the respiration rate of cardiac fibers 87–90

S.P. Bessman and C. Mohan: Insulin as a probe of mitochondrial metabolism *in situ* 91–96

W.S. Kunz, K. Winkler, A.V. Kuznetsov, H. Lins, E. Kirches and C.W. Wallesch: Detection of mitochondrial defects by laser fluorimetry 97–100

D. Köhnke, M. Schramm and J. Daut: Oxidative phosphorylation in myocardial mitochondria '*in situ*': A calorimetric study on permeabilized cardiac muscle preparations 101–113

P. Rustin, D. Chretien, B. Parfait, A. Rötig and A. Munnich: Nicotinamide adenine dinucleotides permeate through mitochondrial membranes in human Epstein-Barr virus-transformed lymphocytes 115–119

L. Bettendorff, G. Goessens and F.E. Sluse: Reversibility of thiamine deficiency-induced partial necrosis and mitochondrial uncoupling by addition of thiamine to neuroblastoma cell suspensions 121–124

M. Löffler, J. Jöckel, G. Schuster and C. Becker: Dihydroorotat-ubiquinone oxidoreductase links mitochondria in the biosynthesis of pyrimidine nucleotides 125–129

B. Kadenbach, V. Frank, T. Rieger and J. Napiwotzki: Regulation of respiration and energy transduction in cytochrome c oxidase isozymes by allosteric effectors 131–135

B. Korzeniewski: Thermodynamic regulation of cytochrome oxidase 137–141

J.-P. Mazat, T. Letellier, F. Bédes, M. Malgat, B. Korzeniewski, L.S. Jouaville and R. Morkuniene: Metabolic control analysis and threshold effect in oxidative phosphorylation: Implications for mitochondrial pathologies 143–148

G. Durrieu, T. Letellier, J. Antoch, J.-M. Deshouillers, M. Malgat and J.-P. Mazat: Identification of mitochondrial deficiency using principal component analysis 149–156

Part III: Mitochondrial transition pore, radicals and diseases

J.J. Lemasters, A.-L. Nieminen, T. Qian, L.C. Trost and B. Herman: The mitochondrial permeability transition in toxic, hypoxic and reperfusion injury 159–165

A.P. Halestrap, C.P. Connern, E.J. Griffiths and P.M. Kerr: Cyclosporin A binding to mitochondrial cyclophilin inhibits the permeability transition pore and protects hearts from ischaemia/reperfusion injury 167–172

J.B. Hoek, E. Walajtys-Rode and X. Wang: Hormonal stimulation, mitochondrial Ca^{2+} accumulation, and the control of the mitochondrial permeability transition in intact hepatocytes 173–179

L. Scorrano, A. Nicolli, E. Basso, V. Petronilli and P. Bernardi: Two modes of activation of the permeability transition pore: The role of mitochondrial cyclophilin 181–184

P.X. Petit, N. Zamzami, J.-L. Vayssière, B. Mignotte, G. Kroemer and M. Castedo: Implication of mitochondria in apoptosis 185–188

G.C. Brown: Nitric oxide inhibition of cytochrome oxidase and mitochondrial respiration: Implications for inflammatory, neurodegenerative and ischaemic pathologies 189–192

J.B. Schulz, R.T. Matthews, T. Klockgether, J. Dichgans and M. Flint Beal: The role of mitochondrial dysfunction and neuronal nitric oxide in animal models of neurodegenerative diseases 193–197

W. Augustin, I. Wiswedel, H. Noack, T. Reinheckel and O. Reichelt: Role of endogenous and exogenous antioxidants in the defence against functional damage and lipid peroxidation in rat liver mitochondria 199–205

Part IV: Mitochondrial genome and diseases

S. Hofmann, R. Bezold, M. Jaksch, P. Kaufhold, B. Obermaier-Kusser and K.-D. Gerbitz: Analysis of the mitochondrial DNA from patients with Wolfram (DIDMOAD) syndrome 209–213

J.P. Masucci, E.A. Schon and M.P. King: Point mutations in the mitochondrial $tRNA^{Lys}$ gene: Implications for pathogenesis and mechanism 215–219

T. Ferlin, G. Guironnet, M.-C. Barnoux, R. Dumoulin, G. Stepien and B. Mousson: Detection of mitochondrial DNA deletions by a screening procedure using the polymerase chain reaction 221–225

J. Montoya, H.L. Garstka, A. Perez-Martos and R.J. Wiesner: Regulation of mitochondrial transcription by mitochondrial transcription factor A 227–230

S. Zanssen, M. Molnar, J.M. Schröder and G. Buse: Multiple mitochondrial $tRNA^{Leu[UUR]}$ mutations associated with infantile myopathy 231–236

P. Kaufmann, M. El-Schahawi and S. DiMauro: Carnitine palmitoyltransferase II deficiency: Diagnosis by molecular analysis of blood 237–239

Part V: Ageing, mitochondria and diseases

F.J.M. Trijbels, W. Ruitenbeek, M. Huizing, U. Wendel, J.A.M. Smeitink and R.C.A. Sengers: Defects in the mitochondrial energy metabolism outside the respiratory chain and the pyruvate dehydrogenase complex 243–247

M.V. Riepe and A.C. Ludolph: Chemical preconditioning: A cytoprotective strategy 249–254

I. Maurer and H.-J. Möller: Inhibition of complex I by neuroleptics in normal human brain cortex parallels the extrapyramidal toxicity of neuroleptics 255–259

A. Dörner, K. Schulze, U. Rauch and H.-P. Schultheiss: Adenine nucleotide translocator in dilated cardiomyopathy: Pathophysiological alterations in expression and function 261–269

T. Klopstock, M. Naumann, P. Seibel, B. Schalke, K. Reiners and H. Reichmann: Mitochondrial DNA mutations in multiple symmetric lipomatosis 271–275

J.M. Schröder and M. Molnar: Mitochondrial abnormalities and peripheral neuropathy in inflammatory myopathy, especially inclusion body myositis 277–281

E. O'Gorman, T. Piendl, M. Müller, D. Brdiczka and T. Wallimann: Mitochondrial intermembrane inclusion bodies: The common denominator between human mitochondrial myopathies and creatine depletion, due to impairment of cellular energetics 283–289

K. Majamaa, H. Rusanen, A. Remes and I.E. Hassinen: Metabolic interventions against complex I deficiency in MELAS syndrome 291–296

A. Lindner, E. Hofmann, M. Naumann, G. Becker and H. Reichmann: Clinical, morphological, biochemical, and neuroradiological features of mitochondrial encephalomyopathies. Presentation of 19 patients 297–303

S. Papa and V.P. Skulachev: Reactive oxygen species, mitochondria, apoptosis and aging 305–319

D.J. Taylor, G.J. Kemp, C.H. Thompson and G.K. Radda: Ageing: Effects on oxidative function of skeletal muscle *in vivo* 321–324

E.J. Brierley, M.A. Johnson, O.F.W. James and D.M. Turnbull: Mitochondrial involvement in the ageing process. Facts and controversies 325–328

G. Lenaz, C. Bovina, C. Castelluccio, R. Fato, G. Formiggini, M.L. Genova, M. Marchetti, M.M. Pich, F. Pallotti, G.P. Castelli and G. Biagini: Mitochondrial Complex I defects in aging 329–333
